

NAGeP

National Association of Government Entity Programs

John Salisbury Educational Resource Development Grant Program

Project Specifications

- In order to ensure competitive pricing, members shall seek a minimum of three written quotes from vendors whenever possible.
- Given adult attention span limitations, training videos shall not exceed 30 minutes in length. Interactive web-based or CD ROM educational resources shall not exceed 60 minutes in length for a given topic.
- All interactive web-based or CD ROM educational resources shall be Sharable Content Object Reference Model (SCORM) compliant. This will ensure that the resources are transferrable to the various Learning Management System platforms employed by NAGeP members.
- Since end users may have different technological capabilities, web-based educational resources shall incorporate low and high bandwidth options.
- Self-paced web-based training programs shall include a final knowledge test requiring at least a 70% pass rate. Passing shall allow the student to print out a certificate of completion.
- Any audio, graphic or video assets used in the educational resources shall be owned by the member/developer and be free of encumbering royalties.
- By accepting NAGeP grant funding, members acknowledge that any educational resources developed are jointly owned by the member and NAGeP. This joint ownership shall survive in the event the member decides to terminate its affiliation with NAGeP.
- Educational resources developed using NAGeP grant funds shall include an acknowledgement or “splash” on the title page reading as follows:

“Funded in part by the National
Association of Government Entity Programs”

- In the event of unusual circumstances and subject to NAGeP education committee approval, an individual member may acquire full ownership of the educational resources they have produced using NAGeP educational resource development grant funds by refunding any funds used to develop the educational resources.
